Education

- **University of North Texas** *Jan 2021 - Dec 2025*
  Ph.D. Candidate in Computer Science and Engineering GPA: 4.0 / 4.0
  Advisor: Mark V. Albert, Ph.D
  Co-advisor: Weishi Shi, Ph.D

- **University of North Texas** *Jan 2021 - May 2024*
  M.S. in Artificial Intelligence GPA: 3.9 / 4.0

- **Chittagong University of Engineering and Technology** *Mar 2014 - Dec 2018*
  B.Sc. in Computer Science and Engineering

Experience

Graduate Research Assistant, Biomedical AI Lab *Jan 2021 - Present*

- **Wearable Gesture Recognition System:** A fast and flexible gesture recognition system that uses wearable sensor data from motor-impaired people who cannot speak. The primary focus is enhancing the custom gesture learning strategy by implementing transfer learning, meta-learning, and continual learning techniques using a few training examples [1, 2].

- **Rehabilitation and ML Validation:** The feasibility of using computerized adaptive testing (CAT) on tablet computers for rehabilitation inpatients was evaluated [3]. The ML validation work provided an overview of common limitations and their solutions in machine learning model validation for medical applications [4].

Graduate Teaching Assistant, University of North Texas *Jan 2021 - May 2023*

- **CSCE 5218 Deep Learning:** Utilized minitorch to prepare assignments and assisted students in completing them.

- **CSE 5280 AI for Wearables and Healthcare:** Guided students throughout the project, from brainstorming ideas to final implementation. Additionally, I assisted instructors in creating exam questions and graded assignments.

- **CSCE 1030 Computer Science I:** Spent three hours instructing a lab class where I helped freshman students solve programming problems utilizing C++. I also assisted students in completing their projects.

- **NSF-ReU Summer Research:** During a 10-week summer research program, I guided undergraduate and graduate students, facilitating their research activities and implementing ideas.

Software Engineer, JMJ CODE *Oct 2020 - Dec 2020*

- **Application development:** Contributed to developing different web application modules for online vendors. Technologies: ASP .Net, HTML, CSS, Javascript, MySQL.

Research Student *Jan 2018 - Mar 2019*

- ***OptiFit:*** A smartphone application, *OptiFit* provides the functionality to automatically measure the four essential dimensions (length, width, arch height, and instep girth) of a human foot from images and 3D scans [5].

- **Vision-based Bengali Sign Language Detection:** Implemented a real-time automated translation system utilizing Convolutional Neural Networks to translate Bengali sign language into Bengali words [6].

Technical Knowledge

- Programming: Python, C++, Matlab
- Machine Learning: PCA, SVM, Neural Networks, CNN, LSTM, Transformers, etc.
- ML Tools: TensorFlow, Keras, PyTorch
- Application Development (Android and Web)
